showering and bathing from...

AQUALISA

Midas 100[®]

Sleek, modern looks, thermostatic precision, reliability and outstanding performance only touch the surface of what Aqualisa's Midas 100 exposed shower and bath shower mixer range offers. Suitable for high pressure or combination boiler systems, it is packed full of great features for the bathroom, plus it's a dream to install.

Easy to install... simple to use

- Thermostatic, exposed shower and bath shower mixer range
- Metal build and construction
- Innovative easy fit fixing bracket makes installation a dream
- Exclusive to Midas 100, 'all in one' packaged fixing bracket and shower system
- 12, 9, and 6 litres per minute flow regulators available
- Comes complete with height adjustable, multi mode shower head with three spray patterns
- Finished in hard-wearing, durable chrome
- Co-ordinated monobloc basin mixer tap completes the range
- Positive selector on bath shower mixer – just lift and twist for shower – twist and release for bath
- Midas 100 bath shower mixer is suitable for deck or wall mounting and comes complete with deck mounting fixing brackets
- 5 year manufacturer's guarantee

For optimum user control, the Midas 100 valve incorporates a temperature selector with a maximum temperature override button and a flow control knob.

1st fix box

Boxing clever

Use Midas 'easy fit' bracket and benefit from a range of innovations to make the job even easier. Plus, exclusive to Midas 100, choose the easy access 'all in one' 1st fix/2nd fix packaged version. To use, remove the bracket from the side compartment, fit it and when you need to finish the job – just open the security sealed main compartment and everything you need is there. The easy fit fixing bracket can be bought separately as an accessory, or in an 'all-in-one' box.

Midas 200[®]

Sleek and elegant with contemporary styling and a luxurious metal finish, Midas 200 is the ideal choice for the modern family bathroom. Combine this with flawless reliability and outstanding showering performance and the decision is simple. Plus, the installer can choose from a range of accessories like the innovative, easy fit bracket to make installation easier, or the co-ordinating basin monobloc tap to complete your bathroom design.

Beyond showering

- Thermostatic exposed shower and bath shower mixer range
- Luxury, metal build and construction
- Choice of high pressure/combi and low pressure variants to suit the water system
- Maximum temperature override button comes as standard
- Innovative, (patent applied for) concealed fixing bracket designed to make installation easier
- Comes complete with a superior height adjustable, multi mode shower head with three spray patterns
- Bath shower mixer comes complete with deck mounted fixings
- Co-ordinated monobloc basin mixer tap also available
- Finished in hard-wearing, durable chrome
- 5 year manufacturer's guarantee

The Midas 200 thermostatic valve features a maximum temperature override button, a flow control knob, and for high pressure variants an Eco stop flow control.

Basin monobloc tap

The co-ordinating Midas basin monobloc tap is finished to the highest standard and will complete the look of your bathroom.

Midas 200 exposed shower

Midas 200®

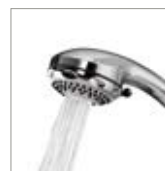

A beautiful performance

- With low pressure gravity systems, Midas 200 typically provides an impressive 7 litres per minute*, up to twice the flow rate of competing showers
 - Midas 200 can deliver an amazing 18 litres per minute** through high pressure systems
- * at 1 metre head
** through a typical unvented system

Shower heads

Midas 200 shower and bath shower mixers come complete with a luxurious, superior shower kit which offers three invigorating spray patterns.

Easy fit bracket

Midas 'easy fit' fixing bracket has been thoughtfully designed and packed full of innovations. To make installation simple and performance great, it is both strong and light, so no matter what the job presents, the fixing bracket can provide the answer.

First fix, second fix packaging

Designed with the installer in mind, this clever packaging system for Midas 100 means the installer can access the easy fit bracket, fix it, and return later to finish the job – secure in the knowledge that the shower system is still sealed in the box.

2nd fix box contains Midas 100 shower system

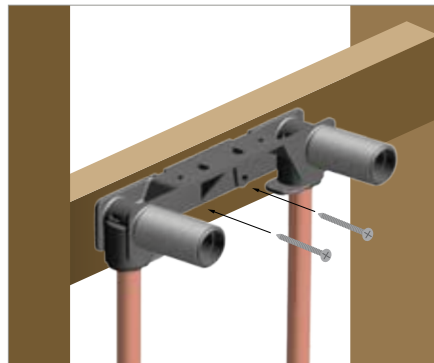

1st fix box contains easy fit bracket

Multiple fixing options

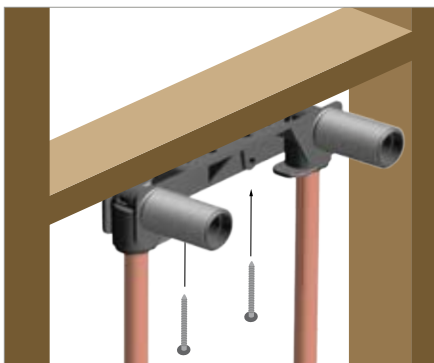

1 – Solid wall

The bracket is slimline, so only 30mm insertion depth is required.

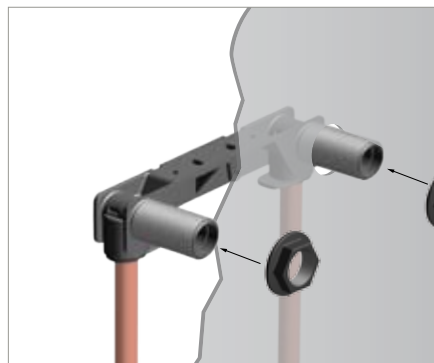

2 – Stud wall

In a typical 75mm stud wall, the bracket can be screwed onto a noggins.

3 – Thin stud wall

Even with 45mm metal stud walls, the bracket can be screwed vertically to a noggins.

4 – Panel mounting

For wall panels where there are no noggins, the bracket can be secured by clamping in place with the back nuts.
