

THE ULTIMATE GLASS PROTECTION

Keep your shower looking brand new with Simpsons' Clear Glass Protection. An effective invisible coating, it acts as a lasting protective barrier on the surface of the glass, helping to drastically reduce staining from hard water and chemical deposits that accelerate the ageing process.

HOW DOES IT WORK?

Simpsons Clear is a colourless treatment applied to our shower glass. Soils and liquids tend to 'slide off' surfaces treated with Simpsons Clear coating, helping to prevent build-up and making the glass easier to clean.

- Resists stains, particularly oil based stains
- Easy to remove hard water deposits
- No need for aggressive cleaners

Untreated glass can quickly easily suffer permanent bonding of limescale and mineral salts onto its surface that can cause staining and damage with water spots being difficult, if not impossible, to remove despite regular cleaning.

Supplied as standard, Simpsons Clear Glass Protection is a colourless treatment applied to our shower glass that keeps glass sparkling without any stains. Helping to prevent build up and making the glass easier to clean, the invisible coating allows soils and liquids to 'slide off' the treated surface. It is chemically non-reactive and non-stick, preventing limescale and other dirt from building up half as fast to make cleaning a simple, quick process.

Supplied as standard, Simpsons Clear Glass Protection is a colourless, invisible treatment applied to our shower glass to keep glass sparkling without any stains by allowing soils and liquids to 'slide off' the treated surface.

It is chemically non-reactive and non-stick, which prevents limescale and other dirt from building up half as fast to make cleaning a simple, quick process; enhancing its durability to protect against the damage of oil based substances and the build up of unwanted fingerprints.
