

FREE-STANDING BATH/SHOWER MIXER

Installation and Maintenance Instructions

This mixer should be installed in compliance with Water Regulations. For further details contact your Local Water Authority.

Fitting your new mixer is easy when you follow these simple step-by-step instructions.

- Identify all components.
- Prior to installation, flush out pipework to remove debris.
- Turn off water supply.
- Place fixing plates (10) on the floor in required position and mark hole locations.
- Drill holes in the floor and place the wall plugs (11) into the holes.
- Connect the flexible pipes (12) to the hot & cold water supply and then match the holes.
- Ensure taps are in the off position.
- Turn on water supply and check for leaks around the flexible pipes (12).
- Line the fixing plates up with the wallplugs (11) with the tap in the correct position.
- Tighten the screws (9) until stand pipes (6) are held secure.
- Tighten the nuts (8) to secure onto fixing plates (10).
- Slide cover plates (7) down over fixing plates (10).
- Fix shower hose (2) to the handset (1) and cradle, and then place the handset (1) to the cradle.
- Test the tap for leaks.
- Installed.
