Installation Guide

Models Covered:

Wall Hung Pans

Please keep this booklet for future reference.

Installer: When you have read these instructions, please ensure you leave them with the user.

INTRODUCTION

Thank you for buying a Heritage Product. When you buy a Heritage product, you can be confident that it not only features a beautiful, distinctive, classic design, but that it has also been made to the very highest quality standards.

To ensure that it works to its full potential, it needs to be fitted correctly.

These fitting instructions have been created to give you all of the information you need and, if you need any further help, please do not hesitate to give us a call on: **0330 026 8503**.

SAFETY NOTES

Please make sure you read these instructions and retain for future use.

All products manufactured by Heritage Bathrooms are safe, providing they are installed and used correctly and also receive maintenance when needed.

Toilets, including the connecting water and waste system need to be installed in accordance with and meet the requirements of the Water Supply Regulations 1999 (Water Fittings) and current by-laws. If you are in doubt about your ability to install this product correctly or safely, you should employ the services of an experienced qualified plumber.

This product must not be modified in any way otherwise this will invalidate the guarantee.

Consider the following whilst using power tools:

- Prior to drilling into walls, check there are no hidden electrical cables or wires and there are also no water pipes. These can potentially be found using an electrical or metal detector. You may also need to know some of the schematics of previous installations to determine the suitability and accommodation of the installation.
- Wear the correct PPE, especially ear, eye and hand protection when using power tools. Unplug any mains equipment after use.
- Keep electrical equipment away from sources of water.
- If a blow-lamp is used when plumbing, the flame must be kept well away from the product otherwise damage may occur.

Two people will be required to safely manoeuvre the pan and cistern due to the weight of the product. It will also be beneficial to have somebody to hold the product whilst marking and levelling is achieved in order to prevent injury.

Prior to completing the installation of a toilet, you will need to take into consideration the water supply and soil pipe positions. All Heritage cisterns have a bottom, right hand side connection for the water inlet. We advise planning where to fit the toilet first, then preparing the pipework ready to fit. For wall hung pans, you will also need to take into consideration the footprint of the pan, since all pipework will need to fit inside the concealed space. Due to the nature of ceramic materials, there can be a 5% variation within dimensions. We advise taking dimensions directly from the purchased product during first fix. Pan connectors are not supplied with this pan/cistern.

Note: It is the responsibility of the installer to select a suitable pan connector for your installation.

INSTALLATION - SIDE FIXINGS

1

Measure the crucial dimensions on your pan in order to fit your pan and cistern correctly. Refer to your cistern fitting instructions to install the frame.

Crucial Dimensions

IMPORTANT

It is crucial that these measurements are taken accurately from the product you are fitting. Failure to do so may mean the product will not fit.

2

Pre-Fitted Plastic Fitting

To keep the plastic side fixings in position, insert hex keys into the grub screws either side and turn slightly to grip.

Screw on the fixing bolts with the recesses pointing left and right on each side. At the back of the pan, make sure the pre-fitted plastic fittings are in place and have the large grub screws lined up with the side fixing holes.

INSTALLATION - SIDE FIXINGS

- 3** Connect the concealed cistern to the wall hung pan using pan connectors (not supplied). We recommend using soapy water on the rubber connection points to soften, making it easier to push on to the pan.

Adjust the pan so it sits level at the top.
Secure in place using the grub screws and hex key provided.

Turn on the water supply at the isolation valve and check for leaks. Allow the cistern to fill up with water and adjust as per separate instructions with cistern; check the flush works correctly.

- 4** Complete a final check to make sure the pan is level and the cistern is in working order. Push on the caps to conceal fixings and apply a suitable sealant around the edge of the pan for watertightness.

SAFETY FIRST

Two people will be required to safely manoeuvre the pan and cistern due to the weight of the product. It will also be beneficial to have somebody to hold the product whilst marking and levelling is achieved in order to prevent injury.

INSTALLATION - FRONT FIXINGS

- 1 Measure the crucial dimensions on your pan in order to fit your pan and cistern correctly. Refer to your cistern fitting instructions to install the frame.

Cruicial Dimensions

IMPORTANT

It is crucial that these measurements are taken accurately from the product you are fitting. Failure to do so may mean the product will not fit.

- 2 Connect the concealed cistern to the wall hung pan using pan connectors (not supplied). We recommend using soapy water on the rubber connection points to soften, making it easier to push on to the pan.

- 3 Adjust the pan so it sits level at the top. Secure in place by tightening the nuts and washers within the range of 8-12Nm to keep in position. Push on the caps to conceal the fixings.

Turn on the water supply at the isolation valve and check for leaks. Allow the cistern to fill up with water and adjust as per seperate instructions with cistern; check the flush works correctly. Apply a suitable sealant around the edge of the pan for watertightness.

CARING FOR YOUR PRODUCT

Heritage products are made from premium materials, with hand polishing and electroplated finishes. Your product should be regularly cleaned with warm water, a mild pH-neutral liquid soap, and polished with a soft cloth. Any residues from soap, toiletries etc. should be rinsed off straight after use.

Household bleaches and cleaners contain harsh chemicals and may damage the surface finish. Avoid using abrasive cloths, scouring pads, scrub sponges, steel wool or anything similar. In the event that bleach is used to clean the toilet, leave the seat up to prevent damage to the finish.

For plastic toilet seats, make sure that the seat isn't exposed to direct sunlight as this may cause discolouration. Do not use excessive force to open/close toilet seats as this can cause cracks or failure of performance.

Do not stand or place heavy objects on the seat cover. The weight could damage the seat cover and may cause falls/injuries. Keep children out of reach of the seat to avoid injury.

GUARANTEE

The confidence we have in the quality of our products and services enables us to offer a free peace-of-mind product guarantee from 2 years up to a lifetime guarantee against any manufacturing faults, with proof of purchase. In addition, our attentive customer service team are available to help solve any problems which may arise quickly and effectively so you can enjoy your bathroom.

NEED HELP?

In the unlikely event that you encounter a problem with your Heritage product, you must, in the first instance, contact the retailer you purchased it from. They will advise as to whether it is due to a manufacturing fault or an installation fault. If the problem is due to a manufacturing fault, they will contact us to arrange a supply of a replacement product as soon as possible. To speak to a Heritage customer service advisor, please contact our technical helpline on **0330 026 8503**.
