

## purquartz – Care & Cleaning

Daily cleaning may be done with any non-abrasive cleaner. After every use, rinse and wipe the sink dry with a clean, soft cloth to eliminate any water spots or soap film build-ups.

### **REMOVING STAINS AND MINOR SCUFFMARKS:**

Normal Stains - use a mild abrasive cleanser, along with a soft scouring pad.

Stubborn Stains - a solution of 50% bleach, 50% water should only be used for tough, stubborn stains. Let the solution sit in the bottom of the sink for one hour; then scrub, rinse well.

### **LUSTRE:**

Mineral oil applied with a damp cloth can be used to restore the lustre.

### **MISCELLANEOUS:**

To remove calcium deposits (a white ring around the bottom of your sink) use a lime scale cleaner.

To remove adhesive labels, use acetone (nail polish remover).

### **WHAT NOT TO USE:**

- 1) Do not use any abrasive cleaning agents or scrub pads, such as steel wool
- 2) Straight bleach
- 3) Commercial alkalis, such as ammonia and/or caustic solutions
- 4) Drain blocking chemicals that involve filling the sink with water

**Note: Always test any stain removers in a small, non-visible location**
