

AFTERCARE INSTRUCTIONS

Excessive exposure to water will deteriorate the furniture. Wipe away any water splashes or condensation after use. **Do not allow water to sit on the countertops or inside the drawers.**

All bathrooms should be well ventilated. We recommend the installation of a suitable extractor fan.

Clean with a soft damp cloth only.

Use a wax free polish if one must be used.

1.
Mark the location of both mounting plates ensuring that they are positioned inside the side panels. The recommended height for the unit including basin is 850mm.

2.
Drill 2 holes per mounting plate using an 8mm drill bit to a depth of 55mm. The fixings supplied are for solid walls. For hollow or stud walls use specialist fixings.

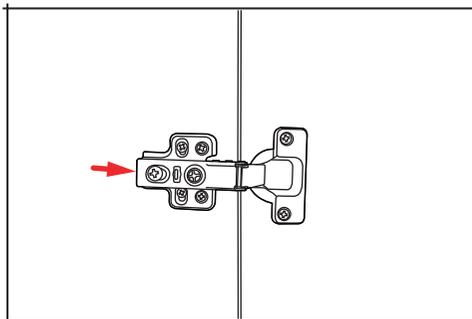

The Brackets may arrive fixed together, 'Snap' down the middle to separate.

3.
Before mounting the unit, we recommend removing the drawer/doors. To remove the drawer, it should be fully extended and pulled upwards. The entire drawer will release from the guides.

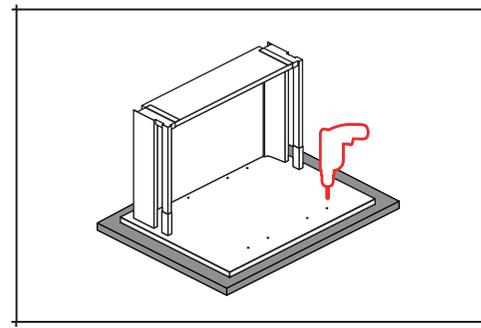

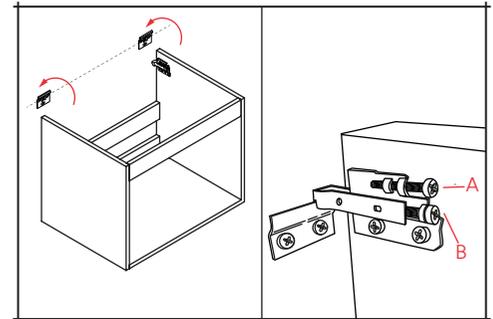

4.
For the door units, to release the door press the release button at the back of the hinge. The door can then be removed

INSTALLATION NOTES

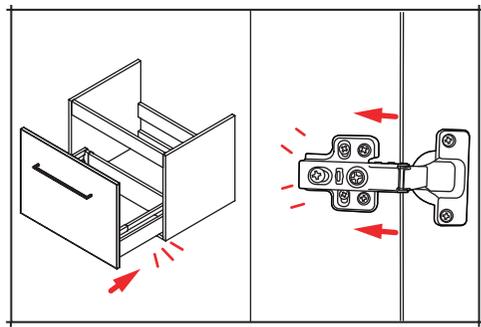

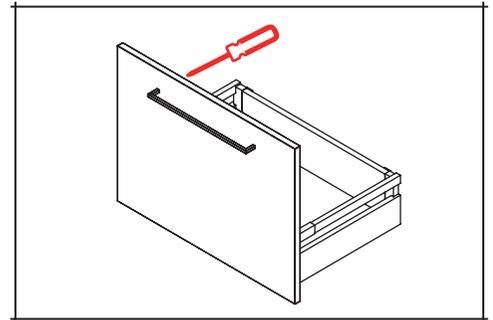

INSTALLATION NOTES

5.
Secure the unit to the mounting plates using the hooks fitted on the unit.
The unit can then be adjusted.
Screw A adjusts the height.
Screw B adjusts the depth.

6.
To ensure the paint does not come off the front panel, place the drawer/door (front face down) on a piece of wood. Drill the pilot holes for the handle width selected.

7.
Using a screw driver and the screws provided with the handle, secure the handle to the drawer/door front.

8.
Return the drawer/doors to their original location. Place the drawer on the guides and push it back until it clicks. Check that it operates smoothly. For door units simply locate the hinges back on their base plates ensuring they click into position.
